Summary

Software Engineer with 4+ years of experience in backend systems and AI systems. Currently building agentic simulation environments and LLM-driven workflows for autonomous agent training. Experienced in production backend systems across enterprise, fintech, and SaaS, using Python and TypeScript.

Technical Skills

- **Languages:** Python, TypeScript, Java, SQL, JavaScript
- **AI & Agents:** LLM Integration, Multi-agent Orchestration, RAG Pipelines, Prompt Engineering
- **Backend:** Node.js, NestJS, Express.js, Flask, Django, Microservices
- **Frontend:** React, React Native, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Azure, Docker, GitHub Actions, CI/CD
- **Testing & Monitoring:** Jest, Postman, Prometheus, Grafana

Professional Experience

AI Engineer

Oct 2025 – Present

Plato Agentic Systems – Canada

- Designed and built simulation environments enabling AI agents to execute multi-step tasks, interact with dynamic systems, and be evaluated on planning and autonomous decision-making.
- Developed structured data generation and annotation pipelines producing 500+ training scenarios used to benchmark and improve agent performance.
- Built backend orchestration systems managing agent lifecycle, context handling, and environment state across 10+ concurrent agent workflows.

Full-Stack Developer Intern

Jan 2025 – Aug 2025

Semper8 Capital Ltd. – Canada

- Built data pipelines and REST APIs delivering normalized financial datasets from 10+ data sources to React-based analytics dashboards used by portfolio management teams.
- Designed scalable backend services in NestJS and MongoDB for a WebRTC platform, implementing a custom signaling server with VideoSDK for reliable real-time video communication.
- Implemented JWT authentication and RBAC, monitored API health via Prometheus and Grafana, and automated CI/CD pipelines using GitHub Actions to streamline build and deployment workflows.

Application Development Analyst

Jan 2021 – Aug 2023

Accenture – India

- Built Python-based backend automation services across enterprise ERP systems, eliminating 25+ hours/week of manual processing for 500+ business users.
- Developed Java and SQL automation scripts optimizing 20+ workflows across development and production environments.
- Built identity provisioning and RBAC tooling managing access for 1,000+ users across 8 global teams, reducing provisioning time by 40%.
- Partnered with cross-functional teams across 3+ global clients in Agile sprints to deliver incremental software releases, leading knowledge transfer sessions that reduced onboarding time for incoming team members.

Education

Master's (Computer Science)

Jan 2024 – Jun 2025

- University of Windsor, Canada

Bachelor's (Computer Science Engineering)

Jul 2016 – Aug 2020

- Karunya University, India

Projects

AI Customer Support Assistant

Aug 2025 – Sep 2025

Freelance – Toronto, Canada

- Built an AI-powered assistant using Python and LLM APIs to handle customer queries for a home services business, including quote requests, availability checks, and common service questions.
- Designed agent-like workflows to categorize queries, retrieve relevant service details, and generate context-aware responses, reducing manual back-and-forth with customers.

Fence Repair Business Automation

Sep 2024 – Dec 2024

Freelance – Windsor, Canada

- Built an end-to-end workflow automation system using Python integrating multiple SaaS platforms (Airtable, Calendly, QuickBooks) to automate lead intake, scheduling, and invoicing for a local fence repair business.
- Reduced manual admin work by automating repetitive tasks; deployed backend services using GitHub Actions CI/CD.

Surplus Donation Platform for NGOs

Jun 2024 – Aug 2024

University of Windsor – Windsor, Canada

- Built a Django and React platform connecting donors with 50+ NGOs across Canada using geolocation (PostGIS, Google Maps API), Redis caching, and Celery background tasks.
- Containerized with Docker and Nginx; designed to handle concurrent donation requests and ensure reliable task processing.

Certifications

Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft

Mar 2024

- **Skills:** AI Concepts, NLP, Computer Vision, Generative AI, Responsible AI

Microsoft Certified: Azure Fundamentals (AZ-900) – Microsoft

Apr 2022

- **Skills:** Cloud Concepts, Azure Services, Security, Compliance, Pricing, SLAs
